

Exhibit 1

This Modification application is being filed to seek Commission consent to add the emission designator "17M5D1D" in the "14.6-15.2 GHz" frequency range at both locations on the license.

In addition, the licensee requests that the Commission update the current licensee name to "DRS Training & Control Systems, LLC". Although assignment of the license to "DRS Training & Control Systems, LLC" was approved pursuant to File No. 0005-EX-AL-2014 (Parent File No. 0004-EX-AU-2014), for some reason the attached application still specifies the prior licensee name.
