Subject: 0235-EX-CR-2017 pre-coordination data request

---

Message:

Dear Sir/Madam,

This is a response to the FAA Coordination Notice that was sent to DRS Training and Control Systems, LLC ("DRS") on May 18, 2017. That Notice reads as follows:

"Prior coordination with the FAA is required for the frequencies 1040.00000000 MHz-1080.00000000 MHz 1040.00000000 MHz-1080.00000000 MHz requested in this application. Please upload the pre coordination document. Please disregard this notification if you already uploaded the pre coordination document."

DRS responds that FAA coordination is not required, because the instant application is a renewal application (FCC Form 405) with no changes to the existing operations.

There apparently is an issue with the FCC's database wherein renewal applications are displayed as modification applications (FCC Form 442). That may be why the FAA Notification was issued.

Because FAA coordination is not required for straight renewals, DRS is not including one here. Please note that DRS wishes to remain in full compliance with the Commission's rules. Accordingly, if any additional information is required at this time, please contact DRS.
