## **Application Narrative for Proposed Equipment**

### **Proposed Program**

Daimler Trucks North America is proposing GPS within their truck manufacturing building for testing purpose.

### **Objectives**

We seek to accomplish the following objectives:

1. Illumination of the part of the manufacturing facility, located at 11550 Statesville Blvd, Cleveland, NC with a GPS signal to allow for the testing and experimentation indoors for continued exploration of utilizing GPS technologies within their trucks to provide innovative applications and continue to provide safe products.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information
3. Ability to troubleshoot and repair GPS systems without having to endure the costly time and expense to relocate the equipment outdoors
