Subject: Request for Info - File # 1196-EX-ST-2020

---

Message:

Regarding the following inquiry, "Your filing says that the University of Montana is in control of the uplink from Bozeman, MT. Explain why the uplink wasn't submitted in a separate filing under the University of Montana's name since applications should be filed by the entity that is in control of the transmitter."

Response: The application was submitted under Dartmouth because Dartmouth is the lead institution of the project and has the ultimate responsibility for Operations including operation of transmitter. The physical location of the earth station is University of Montana, but the Principal Investigator (Robyn Millan) is located at Dartmouth and oversees all operations decisions. MSU will be responsible for physically controlling the transmissions but these are all overseen by the lead institution. We are happy to submit a separate application under MSU if it is deemed more appropriate.
