Subject: Request for Info - File # 1196-EX-ST-2020

---

Message:

In the spacecap please correct the Montana Earth station class to "specific" not typical

The documentation we have indicates a 550 km orbit, but the spacecap has a 500 km orbit. Please confirm the altitude.

The ITU has transitioned to using GIMS (Graphical Interference Management software), all diagrams for all Earth station and space station antenna gain contours. Please download the GIMS software from the ITU website and provide the Earth station and space station antenna patterns in .mdb format.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of January 14, 2021 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
