Subject: Request for Info - File # 1196-EX-ST-2020

Message:

- 1.) The SpaceCap was updated. Montana State Earth Station was changed to "specific" and the lat/lon were added.
- 2.) Altitude: Confirming that the correct altitude is 550 km. This should be correct in the spacecap now.
- 3.) Antenna patterns: We have downloaded the GIMS software and are working on generated new antenna patterns. The "Add Attachments" function of the ELS website does not allow .mdb format. Please advise on how to best submit the files once we have them. If I do not hear specific instructions, I will email them to Doug Young directly.
