

Exhibit 1

The instant application (“Application”), seeks Commission approval for the addition of several new locations to the Station WK2XCW license.

The new locations involve Ground-Based transmissions around specified centerpoint coordinates and the transmitting facilities will be mounted stationary on the ground or mounted on a mobile platform within the stated radius and less than 5 m AGL. The transmitting facilities may be oriented any direction relative to North in azimuth and less than +60° in elevation. When operating at these locations, Dynetics will coordinate operations with the local authorities.
