Message:

Dear Mr. Le,

I was asked to explain the letter "X" in the Emission Designator. The emission is a frequency modulated CW (FMCW) and I may have designated it wrong by choosing the "X". The current designator is FXN, and there is no information contained on the signal, but I didn't want to use a 0 (no modulation) since it is an FMCW and so I chose "X". Is there a better designator I should use? I would be happy to change it per your suggestion.

Thank you.
