STATEMENT OF INTENDED USE OF A
TRANSPORTABLE LAND-BASED INMARSAT TERMINAL

Exxon Communications Company (ECC) provides telecommunication needs of Exxon Corporation and affiliates in the event of an emergency caused by Exxon operations anywhere in the world.

In Exxon's growing emergency response systems, Inmarsat terminals are placed at strategic locations to provide for the need to communicate in a timely manner in order to mitigate any such circumstance. As our communication needs increase, these terminals are added to satisfy these worldwide needs.

The portable terminal will be pre-positioned in Baytown, Texas for emergency response. Because the unit might be relocated for emergency response drills, it should be licensed for use in the United States, should the immediate need for use occur.
