Hello,

We at EWA have an application for the NJ location. Please do not delete the NJ location from the experimental application. The reason why I have completed two applications for the same radar, one for NJ, and the other for VA, is because I thought we would need an application for each site. Ultimately we would like to test in both states. I am new to this application process.

Is it possible to have both sites (NJ & VA) on the same application? If not please delete the VA application. The application with the NJ location is most important to EWA. Please continue with the NJ application file number, 0098-EX-PL-2012.

If you have any questions please contact Nick Connolly.

Thanks,

Nick Connolly
