

Enexus Energy Corporation
Application for New Experimental Radio Station License
FCC Form 442

DESCRIPTION OF THE APPLICATION

Enexus Energy Corporation (“Enexus”) hereby submits the attached application seeking experimental authorization under Section 5.3 of the rules and regulations of the Federal Communications Commission (“FCC” or “Commission”). In particular, Enexus seeks authority to operate certain Telex wireless intercom equipment already licensed to Entergy Services, Inc. (“ESI”) under the call sign WE2XHU.

ESI is a wholly owned, indirect subsidiary of Entergy Corporation (“Entergy”). Entergy contemplates that it will transfer ownership of some (but not all) of the power plants at which the Telex equipment is authorized to subsidiaries of Enexus Energy Corporation (“Enexus”).^{1/} Accordingly, after that transaction is consummated, because Entergy will no longer be the owner of the affected power plants, Enexus will require its own FCC authority to operate the Telex equipment.^{2/} This application seeks that authority for Enexus. Once Enexus acquires the affected facilities, ESI will modify its current license to delete reference to those facilities.

Because this application is submitted so that Enexus may operate the already authorized facilities, there will be no change in the current equipment or the locations at which the current equipment is authorized. Moreover, Enexus hereby agrees to the terms and conditions in the 2007 Consensus Plan between and among the Nuclear Energy Institute, the National Association of Broadcasters, the Society of Broadcast Engineers, the Utilities Telecom Council and the Association for Maximum Service Television, Inc. regarding the use of the Telex equipment specified in this application.

If there are any questions regarding the application, the Commission is asked to contact Russell H. Fox of Mintz, Levin, Cohn, Ferris, Glovsky and Popeo, PC at 202.434.7483 or rfox@mintz.com.

^{1/} Enexus will acquire the operations at the locations described on the current license as Entergy Palisades Nuclear Station, Entergy Vermont Yankee Nuclear Station, James A. Fitzpatrick Nuclear Station, Indian Point Entergy Nuclear Station and Entergy Pilgrim Nuclear Station.

^{2/} The Commission has already consented to the transfer of control of the entities that hold various land mobile licenses that cover operations at the power plants. *See*, ULS file numbers 0003537003, 0003544588, 0003544623, 0003544633, 0003544647 and 0003544670.
