Message:

For ERP and Emission Designator information, refer to correspondence reference numbers 54983 and 54988. Regarding the submission of three antennas, as described in the narrative statement provided with this application the three antennas submitted represent three physically independent devices (implant, patient programmer, and physician programmer) which make up the system seeking experimental license. While these three devices share functional frequencies and emissions and are bounded by the same conducted power limits based on hardware implementations they differ in their construction (particularly antenna design) and therefore have differing radiated performance. Therefore, they were submitted as independent antennas.
