Dear Tony,

Per our conversation today, Ericsson Wireless Communications would like to modify our Experimental Part 5 license application to remove the request for band segments outside of the FCC jurisdiction (thus within NTIA jurisdiction). The file numbers of our applications are as follows:

#0086-EX-PL-2001
 #0087-EX-PL-2001
 #0088-EX-PL-2001
 #0089-EX-PL-2001
 #0090-EX-PL-2001

On all of the above applications, I would like to modify the frequency allocations requested on FCC Form 442, page 2, section 3 to read as follows:

Frequency

(A) Power

(B) Power

(C) Power

(D) Emission

(E) Modulating

Signal (F) Bandwidth

(G)

746-806 MHz 50 watts 2000 watts PEAK F9W CDMA 1250 kHz

806-902 MHz 50 watts 2000 watts PEAK F9W CDMA 1250 kHz

935-940 MHz 50 watts 2000 watts PEAK F9W CDMA 1250 kHz

1850-1990 MHz 50 watts 2000 watts PEAK F9W CDMA 1250 kHz

~~1990-2170 MHz~~ 50 watts 2000 watts PEAK F9W CDMA 1250 kHz

1990-2025

2110-2170

Hopefully this request for change will remove all NTIA controlled band segments, as well as be acceptable to the FCC. Please feel free to contact me if you have any questions, or find any problems with this request. I can be reached by e-mail at doug.sharp@ericsson.com <mailto:doug.sharp@ericsson.com>, or by phone at (303) 473-6833 in my office, or (303) 507-3254 by cellular phone.

Thank you very much for your assistance.

Sincerely,

Douglas Sharp
 Senior Engineer

Ericsson Wireless Communications, CDMA Systems.
