File No. 0029-EX-CN-2017
2/27/2017

Amendment to Narrative Exhibit

We have added one additional location to our original filing, which will be used to set up the system initially and to test software upgrades later in the testing process. The coordinates, which are included as the last location on Form 442, are 39°49'53.31"N / 75°12'11.75"W. The antenna will remain below 6 meters above the ground at this location and the directional antenna information will be the same as is described in the original Exhibit. We will operate at a lower power in this location, as indicated on Form 442.
