

Ericsson

Exhibit to Experimental License Application, File No. 0040-EX-CM-2016

Date Filed: September 29, 2016

Description

Ericsson is filing this request to modify our existing license, call sign WI2XDB, File No. 0801-EX-PL-2015 (as modified by File No. 0065-EX-ML-2016), in order to advance our 5G testing with Verizon. We seek authorization to expand our area of operation for a 3-mile radius around 3025 New Brunswick Ave, South Plainfield, NJ. This address itself is within our existing authorized area of operation. This modification would expand the overall area within which we are authorized to operate, however.

Everything else about our operation will remain the same, including the frequencies, output power, and antenna parameters.
