

Modification Request – WJ2XCH

We are requesting the expansion of the operational radius for the license from 0.4km to 8 km.

The reason for this request is that we would like to understand the propagation characteristics for 28 GHz spectrum in a dense urban/urban/suburban environment. Based on prior experience, we would like the ability to test with a 28 GHz cell radius of up to 8 km from the specified 3 locations. This will provide us very useful data that can assist in wireless network topologies and deployments.
