

Ericsson

Exhibit to STA Application, File No. 1400-EX-ST-2016

Date Filed: September 23, 2016

Ericsson is filing to modify our existing STA, call sign WK9XJW. The existing grant requires that Ericsson not utilize the band 15.35 - 15.4 GHz. We are seeking a modification to drop the lower bound of authorized frequencies to 14.45 GHz, to hopefully avoid the notch. This is the only modification to the existing authorization we are seeking.
