## **Application Narrative for Proposed Equipment**

### **Proposed Program**

FedEx is proposing GPS within their Services Repair Center building for testing purpose.

### **Objectives**

We seek to accomplish the following objectives:

1. Illumination of the part of the repair facility, located at 477 Distribution Parkway, Collierville, TN with a GPS signal to allow for the testing and experimentation indoors for continued exploration of utilizing GPS technologies within their vehicles to provide innovative applications and continue to provide safe products.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information
