Message:

Please see responses inline below.

As a request from US Air Force Spectrum Management Office:

- Please submit a copy of contract H92222-14-C-0012 and all the information that determine who is the government user for this contract.

Agency: US Special Operation Command (USSOCOM)

We have not been authorized by the government customer to release the contract. Please find the contract POC's contact info below for any specific questions.

Name Mr. Eric Barnes

Email: Eric.Barnes@socom.mil

Phone: (813) 826-7281

- Please submit a clarification and operations in details... if this is a ground vehicle-mounted testing only or if this testing involves the actual satellites/s in orbit (e.g., ground vehicle-mounted transmits to the actual satellite/s).

The objective is to establish and maintain a bi-directional link from a vehicle-mounted terminal from a vehicle in motion so the vehicle would be transmitting.

If this testing involves the actual satellites/s in orbit, then please provide the satellite name/s and the owner/s of this/these satellite/s.
