

STA 1471-EX-ST-2016

Request for Expedite

The product, location and antenna information have previously been approved (1038-EX-ST-2016).

Unfortunately, the work had to be postponed. This time, showed a longer window, though should be done in Nov.

This is critical work; in addition to the customer for whom this project is being done, the cumulative work is part of work being done for various US government agencies as part of an urgent counter-drone program, recently receiving a high level of new funding.

Thank you in advance for your assistance.

Note: Likely user error, I was unable to delete the second line of equipment to be used, it repeats the first line.
