Message:

Dear Nguyen-san,

Please receive our answers to your e-mail dated 6/14 as below.

1- How does your experiment perform? (Your response on June 4, 2010 is not clear.)

The purpose of this test is to evaluate cellular phone's quality, performance and so on in the real cellular phone network.

We will receive permission from a network operator to enter their cellular network for this experiment. As for actual method of test, it is very simple, staffs who perform test will make phone call from their cellular phones to cellular phones of other test staffs, just like normal cellular phone use. They evaluate quality of voice calls as well as wireless internet applications.

2- Who will be terminating the system? Please provide name and telephone number.

Anu Appaji
Tel: 1 972 479 2863
Fujitsu Network Communications
Network Operations Planning

3- Please provide latitude and longitude at each location.

I input latitude and longitude at each location at application form.

4- What is radius of operation for each location?

50Km was also entered in the application form.

Should you have any questions, please feel to contact us.

With best regards,
Yoshihiko Taki
