Subject: Request for Info - File # 0053-EX-CN-2020

Message:

There seems to be some confusion about this license request. The NTIA 8.2.36 deals with space segment PSD limits. Our license request is for ground based antennas to communicate with XTAR-LANT, an exist geo-synchronous communications satellite at 30W. I have communicated with XTAR for comment but I am not sure that this data makes sense in the context of the license request. I have checked our license request and do not see where we mis-indicated this request was for an EESS or other space-segment entity. Please let me know if I have misinterpreted the data request.

Thank you,
Bennett Weir
