Subject: Request for Info - File #0602-EX-ST-2013

Message:

We have received word that the Air Force Spectrum Management Office will be granting our request and that we should have an official letter of consent from them early next week. Once received, we will add the letter as an Exhibit to our application and send another correspondence notice to the FCC.

One of the stipulations of their approval is that they will only support us for one year of temporary authorization at a time. It is my understanding that the AFSMO's letter of consent will contain the specific dates that they are approving. Our Form 442 application was originally submitted with requesting a testing duration of 60 months (five years). We would like to change our application to reflect the one year of approval that we'll be receiving from the AFSMO.

Please advise on the best way for us to go about doing this (whether we need to alter our original application or just allow the FCC to grant us (if approved) authorization reflecting theirs and the AFSMO's approved dates).

In addition, if the FCC does approve our request and subsequently requires a "Stop Buzzer" point-of-contact, please use the following:

John Burger
256-704-5601
JBurger@gatr.com

Once again, we'll submit the AFSMO letter of consent once we receive it. Best regards,

-John L. Burger
