---

Message:

We were uncertain how to enter 2nd location near Peebles, OH at GE Aviation Peebles Test Operation.

Peebles test location is 38 deg 55 min 1.2 sec N, 83 deg 19 min 37.1 sec W  
with 1 km radius.

We would like to document that scans take 90 seconds (transmitter is only on for 90 seconds stepping through frequencies), and we generally won't turn scanner on more than 4 times per hour.

We can conduct testing at certain times of day or night for limited periods, if this is preferred by the FCC.
