

* KI2XEA -- Milford, Michigan

Operating time from last license renewal through 10/3/90:

89 MHZ	37.5	Hours of Operation
95 MHZ	37.5	Hours of Operation
107 MHZ	37.5	Hours of Operation

This transmitter is used as a signal source for a vehicular antenna test range.

DEVELOPMENT PROJECTS

- Slot antennas for several future GM vehicles.
- Concealed vehicle integrated antenna designs.
- Technology assessment of new antenna products.

DESIGN VALIDATION ACTIVITIES

The antenna range is also used to conduct antenna system performance validation measurements on prototype and production vehicles.
