Message:

This is in response to your February 4, 2002, correspondence regarding an application to renew the experimental license of WA2XQL, File No. 0288-EX-RR-2001. Globecomm Systems, Inc. (GSI), has never used more than twenty (20) Inmarsat terminals, the most it plans to use. Two documents that detail GSI's Explorer II System equipment specifications have been attached as exhibits to the application. Should you have any difficulty viewing either, please call Jennifer Reyes at 202-777-3984.
