

March 2009

**New Exhibit**

General Atomics Aeronautical Systems, Inc. (GA-ASI) requires this frequency spectrum to support ongoing projects, under numerous government contracts with several U.S. Government Agencies, for Unmanned Air Vehicles with a broad range of scientific and military applications. To support its increasing business GA-ASI has opened a second flight test center at Palmdale close to its original Adelanto location.

Consequently GA-ASI desires to modify its existing license File: 0018-EX-ML-2009 call sign WC2XLR to include a new “fixed” facility that will use all of the same frequencies as the current Adelanto location but will be located in Los Angeles County at the following address:

GA-ASI  
25500 East Avenue R-8  
Palmdale, CA

This modification also includes adding 4 new frequencies to both facilities under call sign WC2XLR that are to be used for flight test support and have been assigned by AFTRCC.

<b>Frequency</b>	<b>Power</b>	<b>Station Class</b>	<b>Emission(s)</b>
123.225 MHz	7 W	FX	6K 00A 3E
123.325 MHz	7 W	FX	6K 00A 3E
123.475 MHz	7 W	FX	6K 00A 3E
123.550 MHz	7 W	FX	6K 00A 3E
