Experiment 0033-EX-ML-2003

---

Message:

Following is the response to your question regarding A3E emissions for file 0033-EX-ML-2003:

We will be testing the airplane's antenna performance characteristics at various frequencies in the Military's UHF band from 225-400MHz. We will be transmitting using the airplane's Rockwell-Collins ARC-210 radio which, by default, emits an A3E (AM) signal in that frequency range.
