Message:

I verified the following information with our Engineers:

1. Our effective radiated power is a continuous wave rather than a pulsed emission, therefore, the mean ERP of 126kw or 501w provided in our application is correct.
2. The frequency tolerances for each of the listed frequencies is 0.005
3. The emission designators are as follows:  
20MBF9W for 5280, 5325, 5375, 5420  
1MBF9W for 5675, 5725, 5775, 5820, 5830
