Question:

In your May 05, 2022 response you indicated that you will be using Commscope's SAS for coordination.

However, on March 31, 2022, Commscope announced that it would be exiting the SAS business on May 31, 2022

[<https://www.lightreading.com/5g/commscope-ditches-sas-business-in-35ghz-cbrs-band/d/d-id/776471>].

Assuming that you plan to operate beyond May 31, you will need to use another SAS provider. What's your SAS plans going forward

Answer:

Yes, CommScope is exiting the SAS business, however for AT&T CommScope SAS services will be available through EOY 12/2022. This was negotiated between CommScope and AT&T CTO and SCM leadership.

The SAS RFP went out last week and we are in the quiet period.

We will have a new SAS provided and transition/migrate existing services well before the 12/2022 date.
