Subject: Additional Information Request

Message:

Hello Mr. Sangani,

The coordinates in the NTIA Space Record had the coordinates in decimal degrees. I have just uploaded an updated NTIA Space Form Exhibit that has the coordinates in the correct format (DDHHMMSS, DDDHHMMSS). The coordinates verified in my previous correspondence (21 40 12 N, 158 02 06W) are correct and are now in the correct format. Please let me know if you have additional question or need additional documentation.

Respectfully,
Raven Moreland
