Subject: Request for Info - STA File #0315-EX-ST-2007

---

Message:

Mr. Young

Thank you for your comments

1. I have to agree with you. Somehow the scope of our testing is increasing. I will file a form 442 immediately. I leave up to you if you want to allow this STA to go through in case the experimental license is delayed

2. We will fix the dates. We are asking for larger flight radius, since our flight tests became very difficult as the ground tracking dish antenna struggled to track the aircraft. We still think the interference potential is almost non-existent at these power levels. We will ask for the increased radius for the experimental license anyway. If you will allow this STA, we can change to the smaller radius if that makes easier, otherwise we prefer the larger radius

Regards

Naiel Askar
