Request for Info - File # 0309-EX-PL-2004

Message:

We received an email with the below noted Request for Information:

Some of the bandwidths that were entered into your application look grossly large. There are some that are 2 GHz and others that are 6 GHz. Please explain.

Confirmation Number: EL204258

dyoung@fcc.gov

The GHz was an error. They should have been noted MHz. I went into the amend/complete application option and made the changes from GHz to MHz. I wasn't sure if that was all that was necessary or if I needed to notify you that I had made those changes. This email is to notify you that we've made the changes.

Thank you,

Jennifer K. G. Robertson
