Washington, DC 20554

Subject: Narrative Statement for Experimental License 0518-EX-PL-2012

Dear Sir/Madam:

An experimental license is needed to demonstrate the capabilities of a prospective communications system to Federal, State, and Local Public Safety organizations under an Internal Research and Development (IRAD) project. This demonstration would require UHF radio transmission of existing COTS equipment within the specified area.

This would allow GDC4S to demonstrate LMR interoperability capabilities of the CrossComm system to show how seamless communications between disparate systems operated by several agencies could enhance inter-agency cooperation and mission execution.

Please contact me if you need any additional information or have any questions.

Regards,

Gil O. Estrella
