

This application requests the following information be treated as classified in accordance to rule sections 0.457 and 0.459:

- Frequency band, upper and lower frequency
- ERP
- Emission designator
- Modulating signal information including the pulse characteristics.

This data needs to be treated as classified secret because it contains information that reasonably could be expected to cause serious damage to the national security. The data has been identified by the USG Abrams Security Classification Guide as Classified. The data entered in these sections on the application is meant as a placeholder only.
