

Exhibit 1
WE2XPZ

In connection with the WE2XPZ renewal application, this is to confirm the following:

- **Stop Buzzer:**

The "Stop Buzzer" point of contact has changed.

The range supervisory technician, Mark Tucker, will be the designated Stop Buzzer.

Mark Tucker: Mobile Phone: 276-782-5106

- **Activities Supported by the License**

The license supports company supported Independent Research and Development (IR&D) activities under non-government contracts, as well as government contracts.

Accordingly, it is requested that the "XT" Station Class be retained on the license.

Should the Commission require additional details regarding the non-government contracts or the IR&D activities, the licensee will provide such information upon request.

The US government contracts currently supported by the license are as follows:

Program/Aircraft:	EA-6B Radome Testing
Customer/Agency Name:	US Navy - NAVICP
P.O. Number:	Not currently active
USG Contract Number:	Not currently active
