

Purpose:

GDC4S Battle Management Division is establishing this GPS repeater installation to support testing of a US Army Shelter program to include the design and build of 10 DE CGS retrofit systems. This system will be used as experimental RNSS Test Equipment for the purpose of testing integrated GPS receivers. The GPS receive antenna will be installed on the roof of the testing facility and the re-radiator will be located "inside" the test building.

The Contract Number for this program is W15P7T-06-D-E402 Strat Services Sourcing (S3) DO #82 and the contact information is provided below.
