

Form 442 Question 7: Experimentation Description

File Number: 0174-EX-CN-2016

Contact: Brian Miller

Email: [brian.miller@gentex.com](mailto:brian.miller@gentex.com)

Phone: 616-772-1800

Purpose of Experiment:

This application is for an integrated toll module, which will be installed within an automobile rear view mirror, to be certified under 47CFR Part 90. As this is the first time we have integrated the toll module within our rearview mirror, extensive testing is needed to optimize performance in a “real” world setting.

For engineering and development purposes, the product will need to be tested both on the Gentex business campus in Zeeland, Michigan; as well as on toll roads throughout the United States to confirm the acceptable performance before we can finalize the design. For this reason, Gentex requests a US nationwide license to test the toll module on toll roads within the United States to assess the product design and performance.

**Locations:**

US, Nationwide

Gentex Corporation  
600 N Centennial  
Zeeland, MI 49464

864 E 24<sup>th</sup> Street  
Holland, MI 49423
