

This document gives the specific overage of our requested transmission power at 5.8 GHz. We wish to transmit an EIRP of 22.6 dBm or 0.779 volts per meter @ 3 meters. The level given in Part 15.249 of the FCC Regulations is 50 millivolts per meter @ 3 meters. Therefore, the power level requested in this application exceeds the regulations by 11.9 dB.
