Subject: Request for Info - File # 0138-EX-ST-2018

Message:

In 2483 - 2500 MHz, our first preference is to reduce to 6 Watts, second is to remove the band.

We also hereby provide an advance response to any additional obstacles to approval, electing to first reduce, second to remove any offending band or sub-band.

Our test window and first test point begin 21-May-2018. Approval is needed in advance of that date.
