The 0145 and 0146 filings regard the same project, but utilize different antennas and corresponding transmit powers. I believe the two applications should be consolidated into a single application. Please note that on application 0146, the response to question 4 should be "no". This is not a federally funded project, but rather is a state government funded project. Also since Mary Ann's applications deals mainly with CW signals, whereas mine relates to OFDM, it may not be appropriate to combine the applications. Please let me know if you need additional information.

one. At 01:54 PM 7/5/02 -0400, you wrote:

>We have two similar filings. It appears that file number 0145-EX-PL-2002 is not as detailed as 0146. Should we delete the first filing 0145? Also, does this experiment relate to filings for Professor Mary Ann Ingram. If they are for the same overall project then it may be beneficial to consolidate all testing into a single license for Georgia Tech.
