Subject: 0426-EX-CN-2019 pre-coordination data request

---

Message:

Good afternoon,

We have modified the two frequencies that required FAA approval (5.5 - now 5.9GHz and 9.5 - now 10GHz).

We have also removed two antenna locations and amended the third to a central location. The radius from the new location will extend to no more than .4 km.

Please let me know if there are any additional questions or concerns. Thank you.

Aaron Jackson
