Subject: Request for Info - File # 0188-EX-CN-2018

---

Message:

We notified NASA that the FCC has suspended processing of the Globalstar Experimental License application until they receive an application from the HaloSAT mission.

NASA responded and provided contact info so that the FCC can contact NASA directly about the HaloSAT CubeSat mission.

NASA response:

=====  
To: Mr. Joseph Crowley, Principal System Engineer  
Globalstar  
461 S. Milpitas Blvd.  
Milpitas, CA 95035

Joe,

This message is following up on our discussion this date concerning the application (0188-EX-CN-2018) which you have on file with the FCC. As you had outlined in your license request your customer spacecraft is a federal mission and thus licensed through the NTIA.

We recently received final (operational) system certification for this mission from NTIA in accordance with Doc.43594/1 and SPS-22932/1 which included inter-satellite operation on the Globalstar system channels around 1615 MHz for communication to the Globalstar system as enabled by your system.

If there are any specific questions or additional information needed you or the FCC representative can please feel free to contact NASA Goddard Spectrum Management directly. My contact information is below.

V/R,

Scott
