---

Message:

FCC Questions:

1. Will the UbiquitiLink and Globalstar modules remain attached to Cygnus throughout the mission?
2. Are they co-located or separate on the spacecraft?

---

Responses:

1. The UbiquitiLink and Globalstar modules will remain attached to Cygnus for the entire mission. The UbiquitiLink Payload, which contains the Globalstar module, will burn up on reentry of the Cygnus spacecraft.
2. The UbiquitiLink and Globalstar modules are co-located. The Globalstar module is contained within the UbiquitiLink payload.
