Request for Info - STA File # 0238-EX-ST-2002- Reply

Message:

In response to questions regarding application 0238-EX-ST-2002, filed by Globalstar, L.P., for an STA for test/demonstration of equipment associated with an ancillary terrestrial component of a Mobile Satellite Service system.

The portable base stations transmit at 2483.5-2500 MHz. The mobile phone units transmit at 1610-1621.35 MHz.

Center coordinates were provided for three test areas, Washington, DC, New York, NY, and San Jose, CA. The base and mobile stations would be operated within 40 kilometers of the specified coordinates. This was explained in the parallel experimental license application (0104-EX-PL-2002).

Three specific locations within those test areas are planned for the demonstrations which are the subject of the STA:

In Washington, DC, Crowell & Moring LLP, 1001 Pennsylvania Avenue, NW 20004 (38-53-40.2 N; 77-1-34.0 W);

In New York, NY, Tavern on the Green, Central Park at West 67th Street 10023, (40-46-22.5 N; 73-58-43.0 W);

In San Jose, CA, Globalstar, L.P, 3200 Zanker Road 95134 (37-24-35.8 N; 121-55-54.5 W).

The base and mobile transmitters would be operated at these locations for the demonstration. The base station would be fixed during the demonstration. The phone unit would be mobile.
