Washington, DC 20554

Gentlemen,

A technology demonstration to accompany a DHS funded exercise is being planned for 17 April in Nassau County, NY. This demonstration is being conducted to introduce new technology/equipment to first responders involved in Homeland Security and Emergency response. Globecomm Systems Inc. is an important part of the exercise/demo. Since the demonstration is in the public interest and the information gained by Nassau County, Office of Emergency Management will help with the health & safety of the public, I respectfully request approval of Globecomm's request.

For additional information on the exercise, please check out page 5A of Long Island Business News - <http://www.libn.com/>. For information on LIFT, please check out our web site at www.lift.org

Sincerely,

Ken Morrelly
President
