Washington DC 20554

Gentlemen:

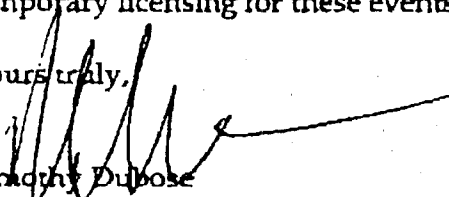

Booz Allen Hamilton Inc. supports NAVAIR's Special Communications Requirements Branch for various satellite communications- related projects. AS such, we have interest in observing various demonstrations of Globecom Systems Inc.'s line of lightweight transportable Ku band satellite communications terminals.

It is our understanding that they will be demonstrating their equipment at the Special Operations Command's Advance Planning & Briefing to Industry (APBI) during the week of June 5, 2005.

Furthermore, they will be demonstrating their equipment to Booz Allen Hamilton and the personnel at the NAVAIR Special Communications requirements Branch at a time to be scheduled in the May or June timeframe.

Therefore, I respectfully request that the Commission approve their request for temporary licensing for these events.

Yours truly,

Timothy Dubose
Project Engineer
