

GOODYEAR TIRE AND RUBBER COMPANY
Rose Bowl and Los Angeles Area College Football
Special Temporary Authorization Application
File No. 0553-EX-ST-2009

This STA request will facilitate the operation of the Goodyear Blimp for video production at the Rose Bowl Parade and related football games at and near the Los Angeles Coliseum in Los Angeles, CA and the Rose Bowl in Pasadena, CA. These are extremely large scale sporting events and use of frequencies outside of the normal 2 GHz BAS/LTTS/CARS band are necessary in the Los Angeles Market, which has severe overcrowding of normal BAS bands.

The events will be as follows:

Event	Date & Time	Location by Latitude and Longitude.
UCLA vs USC LA Coliseum	November 28, 2009 11 am to 11 PM PST	N 34 00.9 W 118 17.1
Rose Parade/Bowl Test Rose Parade Route Pasadena	December 31, 2009 8 am to 6 PM PST	N 34 09.0 W 118 08.9
Rose Parade Rose Parade Route	January 1, 2010 5 am to 5 PM	N34 09.0 W 118 08.9
Rose Bowl Rose Bowl	January 1, 2010 10 am to 10 PM	N34 09.8 W 118 10.1
BCS Championship Game Rose Bowl	January 7, 2010 9 am to 11 PM	N34 09.8 W 118 10.1

All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Society of Broadcast Engineers in the Los Angeles broadcast market. This application proposes the use of Wireless Communications Service spectrum at 2305-2313 MHz. A study of this band in the Los Angeles area shows no active uses being made by the two MEA licensees in this band, KNLB220 and KNLB287, licensed to NW Spectrum Co. and BellSouth Mobile Data, Inc., but operation will be coordinated in advance with those licensees. Operation at 2390-2450 MHz will be coordinated in advance with the American Radio Relay League, Inc.

Should any interference be reported in either band, Goodyear operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected.

Any additional information can be obtained from counsel for the applicant:
