

GOODYEAR TIRE AND RUBBER COMPANY

Video Production Events Special Temporary Authorization Application August, 2012 through January 1, 2013

This STA request will facilitate the operation of the Goodyear Blimp for video production at various sporting events in southern California and in the vicinity of Phoenix, AZ. These include coverage of automobile racing, baseball, golf and related widely attended and televised sporting events in California. These require use of frequencies outside of the normal 2 GHz BAS/LTTS/CARS band which is necessary in the Los Angeles, San Diego and Phoenix Markets, due to severe overcrowding of normal BAS and LTTS bands.

The events will be as shown on the attached list by date, event, location and coordinates.

All operation will be coordinated in advance, as are all radio frequency operations in and around these events, by the frequency coordinators of the Society of Broadcast Engineers and the Southern and Northern California Frequency Coordination Committees in the applicable broadcast markets. This application proposes the use of spectrum at 2390-2450 MHz. Operation will be coordinated in advance with the American Radio Relay League, Inc.

Should any interference be reported, Goodyear operation will cease immediately and not resume until resolved to the satisfaction of the licensee(s) affected.

Any additional information can be obtained from counsel for the applicant:
