Subject: Request for Info - File #0122-EX-PL-2016

---

Message:

Doug,

Our sensors will not be operating on the move, but are mobile in the sense they are easily moved to different locations. Sorry for the mistake on the stating CONUS. We meant to request all 50 state instead of the continental 48. Is there an easy way for me to update the request to fix this? As for justification, we are working with NASA on the UAS Traffic Management (UTM) program, the FAA on Pathfinder and test site programs, and other UAS studies for the safe and secure integration of UAS into the National Airspace System. As a part of these programs we tend to move to different locations depending on what we are working on. We choose to pursue this request in hopes of speeding up the ability to get out test sites setup quicker. In all of these scenarios we would work with local spectrum authorities to address any and all interference issues or concerns. Please do let me know if you have any other questions or need further details.

Thank you,  
Jeff
